

Colima Papaya

Features

Plant

Low growing plant (dwarf), which makes it ideal for greenhouse cultivation. It has a medium-low vegetation, which allows it to increase the density of the plantation by 10%.

Fruit

Fruits are very homogeneous in shape, with a size between 0.8 and 1.2 kg and an average of 14-15° Brix. The fruit has a greater hardness, which gives it a long shelf-life (LSL) or post-harvest life.
