

CGW1095 Cocktail Watermelon

Features

Plant

Vigorous and well-balanced plant. It stands out for its high productive capacity, ensuring good fruit set even under demanding conditions. Its architecture facilitates handling and guarantees uniform fruit development.

Fruit

Round fruit with dark Crimson-type striping, and a thick rind suitable for export. It shows excellent uniformity in shape, size, and color, with an average weight of 3.5–4.5 kg. The flesh is deep red, crisp, and has an excellent flavor due to its high Brix content. Seedless variety (triploid).
